Insight: Deadline pressure is the most common stress trigger Employees across multiple roles consistently experience stress due to tight deadlines and heavy workloads.	Stakeholder management stress, scope creep anxiety				Pressure to meet quotas, rejection stress, team performance metrics		High-stakes decision anxiety, fear of errors in financial reporting			Deadline pressure & performance anxiety	**Category 1 Workload Stress**
Insight: Performance anxiety affects both junior and senior employees Stress is not limited to experience level—many employees fear failure, judgment, and not meeting expectations.		Physical and emotional exhaustion from long shifts, staff shortages	Sleep disruption from late-night calls						Burnout from extended coding sessions	Burnout & Exhaustion	**Category 2 Performance Anxiety**
Insight: Performance anxiety affects both junior and senior employees Stress is not limited to experience level—many employees fear failure, judgment, and not meeting expectations.		Secondary trauma from patient care				Dealing with angry customers daily, verbal abuse, feeling undervalued		Emotional exhaustion from handling employee conflicts, compassion fatigue		Emotional Labor & Interpersonal Stress	**Category 3 Emotional Stress**
Insight: Employees struggle to disconnect from work, leading to burnout Continuous work pressure and lack of personal time contribute to long-term stress and fatigue.			Chronic back pain from long hours						Eye strain	Insomnia and tension headaches	**Category 4 Physical Stress**
Insight: Physical strain is a hidden but recurring issue Long hours, screen exposure, and poor posture lead to fatigue and discomfort that often go unnoticed.				Creative block, harsh client feedback, comparison anxiety with senior designers		Feeling undervalued with limited career progression			Imposter syndrome in competitive tech environment	Self-Worth & Identity Stress	**Category 5 Work-Life Imbalance**
Insight: Employees avoid taking breaks despite high stress levels Workplace pressure and guilt prevent employees from taking necessary breaks, increasing burnout.	Juggling multiple projects simultaneously		Managing multiple teams across time zones				Work-life imbalance during quarter-end			Work-Life Imbalance	**Category 6 Environmental / Workplace Stress**
